Verbund AG (VER.VI) - short relative-only report

Valuation date 2026-10-30 | price date 2026-10-30 | accessed 2026-11-02 | EUR/share unless stated.

STATUS: PROVISIONAL / QA-C NOT PASSED. Source-qualified comparable conclusion BLOCKED. Figures below are reproducible diagnostics, not an unqualified valuation or investment recommendation.

Scope: VER.VI only; standard / published_damodaran / web_minimum. Dated 2026-10-30 cache reused after a VER.VI-only stage-0 top-up (Austria country asset; EUR already present). Reduced input step substituted for Stage 1; DCF and Stage 4 skipped by approved relative_only deviation. Short PDF supplied by explicit user instruction.

1. Financial basis and definitions

FY2025 calendar year, EURm. Revenue vendor 8,033 (issuer 8,013.6); vendor EBIT 2,108 / EBITDA 2,715 (issuer EBIT 2,112.3 / EBITDA 2,737.5); net income to common 1,489 (= issuer Group result); parent common equity 10,341 (issuer equity 11,331.2 incl. NCI 990); total debt incl. leases 2,460; cash 72.79 (+ST inv 1.1); base EV 27,522; effective tax 19.97%; FY2025 declared payout 0.466 (cash-paid 0.89 incl. special dividend). Austrian windfall levy EUR135.9m in FY2025 costs.

2. Comparable method

Ten Europe-listed peers selected at the first Europe step (Tier 1-2: 10; Tier 3: 0; Europe-listed: 10/10); no size/World relaxation. Primary EV/EBITDA median 11.21x, n=10; diagnostic range EUR 54.42-102.17, midpoint EUR 77.91 (+12.1% vs price). Cross-check midpoints: PBV EUR 77.02; EV/EBIT EUR 104.35; EV/CF EUR 70.66; PE EUR 29.40.

3. Published regression method

Austria resolves exact EUROPE equations from regressions_multi_2026-01. PBV is selected by highest published R2 (0.423): EUR 59.61/share; PE EUR 49.77; EV/EBITDA EUR 131.52. Analyst consensus inputs g_eps -4.51%, g_rev -0.98%; payout 0.466; beta 0.14 (atypically low, kept as observed). Decimal units policy per standing approval; alternative policy predictions recorded.

4. Limitations and QA

Peer EV excludes associates proxied by long-term investments (target EUR1,419m LT investments; equity-investment earnings 92.6 remain in denominators). Vendor and issuer EBIT/EBITDA differ by <=0.8%; issuer net debt 2,818 differs from vendor-derived net debt 2,386 (perimeter). The published equations are market-wide, low-R2, approximately ten months old, omit SEy/p-values, and use analyst-growth definitions; negative consensus growth makes PE/PEG dimensions weak. Human Spot_check and full source/ownership/event certification remain pending. QA block C was executed once and not passed; failures are recorded in qa_results.md, not waived.
