Prysmian S.p.A. (PRY.MI) - relative valuation

Valuation date 2026-10-30 | EUR per share | Status: provisional - limitations disclosed | Human Spot_check PENDING. QA block C executed once; no FAIL items.

1. Valuation summary

Item	Value
Currency / current price	EUR 110.40
Primary multiple (peers)	P/E: median 30.98x (growth/fundamental-scaled); raw median 26.98x; n = 10
Peer value per share: p25 / median / p75	111.52 / 134.61 / 178.60
Peer median vs current price	+21.9%
Published regression (chosen)	PBV (published R2 0.423): EUR 85.78
Regression vs current price	-22.3%
Peer set	10 peers; Tier 1-2: 10; Tier 3: 0

2. Peer set and multiples

#	Ticker	Company	Country	Tier	Mkt cap EURm	P/E	P/BV	EV/EBIT	EV/ EBITDA	Distance
1	VWS	Vestas	Denmark	2	24,772	31.84	6.41	22.28	15.84	0.56

3. Peer-multiple statistics and implied value per share

Multiple	Basis	n	Median	p25	p75	Value p25	Value mid	Value p75	Mid vs price
P/E *	scaled	10	30.98x	25.66x	41.10x	111.52	134.61	178.60	+21.9%
P/BV	scaled	10	5.86x	4.83x	6.60x	107.05	129.76	146.26	+17.5%
P/S	raw	10	2.10x	1.41x	3.17x	95.10	141.77	213.96	+28.4%
EV/EBIT	raw	7	18.14x	15.02x	21.30x	67.04	83.39	99.92	-24.5%
EV/EBITDA	raw	7	14.29x	12.77x	16.40x	74.82	85.13	99.40	-22.9%
EV/Sales	raw	7	1.91x	1.13x	2.72x	64.47	117.35	172.23	+6.3%

* primary multiple. 'scaled' = growth/fundamental-adjusted multiple. Values are per share.

4. Published regressions (Damodaran, EUROPE, 2026-01)

Model	Predicted	Actual	Published R2	Implied value	vs price
PE	22.88x	25.41x	0.201	99.43	-9.9%
PBV (chosen)	3.87x	4.98x	0.423	85.78	-22.3%
EV/EBITDA	24.74x	18.03x	0.262	155.87	+41.2%

5. Company-specific notes

- Primary and range:** P/E is primary (growth-adjusted median 30.98x, EUR 134.61; IQR EUR 111.52-178.60), with EV/EBIT as cross-check (median 18.14x, EUR 83.39; IQR EUR 67.04-99.92). Envelope EUR 67.04-178.60, wide by design; no averaging with the regressions.

- Chosen regression below peers:** published P/BV (R2 0.423) implies EUR 85.78 (-22.3%), P/E regression EUR 99.43, EV/EBITDA regression EUR 155.87 (+41%, low R2 0.262). Published equations are market-wide, about ten months older than the valuation date, with no standard error: a gap to price is not proof of mispricing.

- Sensitivities above 15%:** EV/EBITDA regression with the percent-point units reading of DFR and tax gives EUR 128.18 (-17.8%); raw P/E median without growth scaling -12.9%; adjusted P/E p25 -17.2% and p75 +32.7%. Peer leave-one-out moves stay within +/-2.8%.

- Inputs not verified against filings:** StockAnalysis figures for FY2025 (accessed 2026-11-01), no annual-report reconciliation of market cap (internal check 0.0%), associates not collected (pre-associate EV bridge: debt + NCI - cash), growth substituted by fundamental ROE x retention (labelled substituted_input).

- Peer data limits:** peer ISINs pass the check digit but are not verified on the exchange register; VWS has two ISINs in the cache (one unresolved). Ownership and event sources per peer are not collected for this run; the peer set is judgement-based on the eight-dimension similarity score.

6. Method notes and limitations

- Basis: one uniform vendor data source for the target and every peer, FY2025 figures (no TTM or forward mixing), one price and FX date. Issuer-versus-vendor differences are kept as sensitivities, not switched row by row.

- EV bridge: one rule for target and all peers (debt including leases + minorities and hybrids once - cash; long-term investments and associates not subtracted, equity income left in earnings).

- Peers: ten names chosen by an eight-dimension similarity score; they pass the automated hard filters and carry one ownership/event source line each (evidence_review.md). Full two-way ownership history of the whole candidate pool was not certified.

- Industry ratios from the registered Damodaran files are aggregates, not medians; they are a plausibility check only.

- Published regressions are market-wide, low R-squared, about ten months older than the valuation date, with no standard error: a gap to the market price is not proof of mispricing. The model shown is the one with the highest published R-squared.

- Peer interquartile ranges are dispersion, not confidence intervals. Human Spot_check is PENDING (not performed).

- Academic analysis only; not investment advice.
